## Other experience

---

### Activity Leader

Monaco's Department of Education, Monaco  
December 2006 - September 2009

## Personal projects

---

### YesNowGo

Brainstorming web app

**Technologies used:** Not decided yet.

**Description:** An online service that allows groups of people to find the best creative proposal in a limited time. Project came third at the Monaco StartUp Weekend in 2016 and in the last eight at the 2016 Business Plan Competition organized by JCI Monaco.

**Project Maturity:** At the concept stage. For the moment we are refining the decision algorithm and then we will begin the development of the web app.

### Listency

Web app to list your collections

**Technologies used:** HTML, CSS, Javascript, PHP, Laravel

**Description:** A proof of concept to learn Laravel, it's an app to list your collections of CDs, DVDs, vinyls, books, boardgames and video games.

**Project Maturity:** At the concept stage, the list of desired functions and a wireframe of the interface has been done.

### WannaPlay

Mobile app for connecting football players

**Technologies used:** HTML, CSS, Angular, Cordova, Ionic, MEAN Stack, RESTful API

**Description:** A mobile app to connect people wanting to play football in Urban Soccer type centers. The app is coded with the Ionic and Angular framework, framework that can deploy on Android, iPhone and Windows Phone at the same time, it communicates with a RESTful API based on a NodeJS server with a MongoDB database.

**Project Maturity:** Developed at 75%, development stopped because the project was suspended indefinitely.

## Secure Rememberable Password Generator

<http://srpg.tikiwebdev.com/> - Web app to create secure passwords

**Technologies used:** HTML, CSS, Javascript, jQuery, Bootstrap

**Description:** A small project I did during my studies in Australia, it allows users to create complex but easy to remember passwords.

**Project Maturity:** Project completed.

## Alex Down Under

<http://alexdownunder.tk/> - Travelogue

**Technologies used:** HTML, CSS, Javascript, PHP, Bootstrap

**Description:** A proof of concept for learning Bootstrap and perfecting my front end development, a travelogue I coded on my trip to Australia on a handwritten diary idea.

**Project Maturity:** Still in development, the next step is to convert it into a wordpress theme or create an admin panel to create new pages in wysiwyg and improve the audio player.

## Conferences / Hackathon

- Cyber Security Challenge Australia 2014
- StartUp Week End Monaco 2015, 2016, 2017
- StartUp Week End Nice/Sophia Antipolis 2017
